W8OYV-Henry McLaughlin, W8YAB Gene Arnold

"VAS YOU DERE SCHARLIE"?

As this was my first visit to the local amateur club in about twenty years, I was surprised to find a goodly number of my old ham friends, of course they were much younger when I knew them before-but when you stop to think of it I was 46 when I packed the ole KW in boxes, so I wouldn't interrupt world war two. exW8HW-W8DFR.

WHAT DID YOU GET? WHAT'S IT?
HOW DOES IT WORK? WHAT DOES IT DO?
WHATER YOU GONNA USE IT FER?
WONDER IF I CAN MAKE IT WORK ON
144 MC.? I'LL TRADE YOU!!!!!!!!!!!!!!

Ann Hughes and Shirely Rex
W8FMW and K8MZT. - - !!and he told me that
it would only cost \$- - - - - why the - - - - -
can you imagine that?

Thanks a million for the phone radio contact
between my daughter and her husband a few
weeks ago, this- is what makes being an
amateur worth while, thanks again Shirley.

Pop-Roy

The ads for Volkswagen cars always stress the manufacturer's pride of "improvements you can't see" in their car. But we're darn proud of the obvious improvement of this issue of the "Feedline". How about that front page? Thanks to Rob Roy-who not only took the pix, but very generously made up- and printed the entire page! Golly, Rob, we hav'nt even gotten over the swell job you did for us, in printing our membership cards-- and now this! Thanks again, OM!

The Canton Amateur Radio Club code class of the air is now in session on 28.9mc every Monday, Wednesday and Friday night, at 8:00 PM.

A first for the Canton Club! The course is well planned; but of course, like any other project, its success depends on you-the amateur-as well as the code student. We are depending upon you to invite a friend or prospective ham to copy code at your QTH if he does not have a receiver of his own.

No doubt there will be some bugs to be ironed out as the course progresses. A card with your comments would be appreciated. There will be no code class on club meeting nights. All those taking the course are asked to attend our meetings and report your progress. We plan to give a novice exam at the end of the six week course. Alone, this course will not get you a ticket; so practice on your own between classes. Practice only the words and letters covered in class.

W8RTR operators will acknowledge only before and after code sessions, unless they themselves request a signal report.

The rich bachelor uncle in the hospital was about breathing his last. Speaking to his favorite nephew who was sitting at his bedside, the uncle said, "Don't grieve, my nephew, I want you to know that I am leaving virtually all of my estate to you."

"Oh, uncle," said the nephew, "you are so kind to me--Is there anything, anything at all that I can do for you?" Struggling upright, the uncle gasped, "yes--take your feet off the oxygen tube."

Speaking of hospitals, Shirley, K8MZT had some minor surgery done --something about a knee cartilage--but that didn't stop her hamming--operated portable from the hospital! Can't stop some hams!

Heard a new General the other night! K8SWE, Jim Folts dropped the "N" out of his call!

K8MZS, Chuck, and Shirley, K8MZT have both received WAC/SSB.

Proof enough they get out! Don't know what new gear they have in mind, but Charley says he has an A-1 HT-32 + factory-wired Thunderbolt (800 watts AM-1000 watts CW-2000 watts P.E.P.) with pad and manuals--both purchased new June '60. Hear them on sked 10 thru 80--\$475.00 each. \$900 for both, including shipping charges. (Will finance) Call Charley Rex, 2225 Mt. Vernon Blvd NW. Canton 9, Ohio GL3-0638 There's a chance to go hi-power in class!

Bob Unkefer (GL4-1250 during the day--GL6-2563 at night) wants to buy a used crystal-controlled receiver to receive city police calls.

John, K8LBZ, won some sort of a scholarship the other day--Don't be modest, John, tell us all about it--understand he was one of the lucky ones out of thousands!

The Family of the late

Walter C. Kirsch
Gratefully acknowledges your
Kind expression of Sympathy

We have been able to meet in the Red Cross building for many years now. We have the advantages of a nice meeting place, with light and heat provided--and we do not have to worry about the safety of our club equipment. At times in the past, the Red Cross officials have found fault with us--and in all fairness, these criticisms have often been justified. It is pleasant now to hear complimentary remarks about the conduct of our attending members and visitors. We are expected to clean up after each meeting--and as our meetings get larger, the clean-up becomes quite a chore. Let's not continue to leave this job for one or two fellows every time--pitch in with a helping hand.

A reminder to old-timers and new-comers alike:----- The front door must always be locked. If other meetings or classes are in session in other parts of the building, give them the courtesy you would expect in your meeting, please be QUIET! Do not put cigarette butts or ashes in the waste baskets. Use our club ash-trays only--and these must be left on a table or desk. They will be cleaned up by Red Cross people the next morning. This is a precaution against fire, so please do as we ask. Stay in the rooms where we are holding our meeting--and leave Red Cross equipment alone. If we respect our "host", we can be sure of remaining welcome "guests" for a long time to come. We have "returned the favor" of a meeting place by cooperation with the Red Cross on S.E.T. once a year. During Hurricane Donna last year, we earned the gratitude of the Red Cross through the efforts of Al, K8DHJ--who put in many hours at the club station. There are a number of Red Cross nets--some of which meet as seldom as once a month--anyone interested in joining one of these nets? Very few of you are aware, I'm sure, that the Red Cross maintains a "leased-wire Teletype" system between its major cities. Ham messages, from areas without normal communications during an emergency, can be fed into this "land-line" system for quick handling to any part of the country. Here certainly is a field in which amateurs can be of service in times of distress.

Henry, W8OYV, recieved a letter from Al, K8DHJ, down in Florida with the Navy--Its short and interesting--soooo-thought you'd like to "read the mail".

2-13-61

Hi Hank,

Seems as though CARC is really growing by leaps and bounds.

Glad to hear it.

Many thanks for the very nice membership card--you fellows ought to be real proud of them--they really are nice.

Tell Bill Green I hope he gets his Novice real soon.

Item of interest: K8DVJ is operating from Guam as K8DVJ/KG6--he is on 20 meters, 14.3 I presume SSB, he is using HT32, TA33 & SX101. Last letter I had he told me he is in charge of the ham rig--how about that? Don't know what time he is on the air as he neglected to tell me. I wrote him and told him to tell me a time, Hi.

Activity here at W4POY is on the increase--we have 25 members & 15 of them are licensed hams. That's a pretty good percentage, Hi.

I only have 'til April left on this base then I go to

Pensacola for school. Probably be home in Sept. So, keep the club busy, hi.

Tell the gang hello for me. Until I see you again, Lots of DX to all and good luck to all.

PS. Here is a buck for the bulletin. 73, Al Latta K8DHJ

Thanks, Al, for the nice letter--and the buck, HI!

From Shirley Rex, K8MZT:

In our search of the call book for YL's and XYL's from Stark County we uncovered several who apparently are not active.

W8EKL-Mae Rauvola; K8LEV-Emma Pumphrey; K8VHG Leora Rainey; K8VKT Edith Keeton; K8VNZ "Edie" Betzler; KN8VJC Tessie Blazekovich; KN8WLQ Linda Ballinger; K8MZT Shirley Rex--all these of Canton. W8NAL Carmella Cicerello; W8NNH Amelia Yob; W8YGD Viola Hahn-of Massillon, and Ann Hughs of East Sparta, W8FMW.

There is now an Ohio YL organization called the Buckeye Belles- just register with K8MZT for a number--abide by the Amateur Code of Ethics and be a member. No dues, but you will be asked to lend your services to any feminine licensee or interested party. A certificate will be forth coming--Those interested will tune in on Mondays, 7260 at 1800 G M T-join us. We are looking for CW operators and activity on other bands. In case you can't hear a local station, listen for W8HWX, OTK, MBI, RZN, SPU, HUX, GSH, SSF or K8ITF, or HGD. Lend your support and the money for the certificate will come from a sponsor somewhere. We know somebody will want to help us if we help ourselves.

PROGRAM-MARCH 15

The Case of the Cosmic Rays

?????????????

Sounds Spooky

New Novices: KN8YOM; KN8YLK. Hear K8HUI is going mobile--in fact, he is already there. Of course, the receiver is still in the house, but by turning the volume way up-----!

That's a pretty good looking used car. What's the most you ever got out of it?

"Twelve times in one mile."

"Is'nt Johnny a lovely boy?"

"He certainly is."

"He dresses so nicely."

"And quickly, too."

Here's to my perfect girl,
I could not ask for more,
She's deaf and dumb and oversexed,
And owns a liquor store.

"Yes, I'll give you a job. First thing I want you to do is sweep out the store."

"But I'm a college graduate."

"Okay, Ill show you how."

Policeman: "Have you any explanation for wandering about this time of night?"

Drunk: "If I had an explanation, I'd go home."

"What causes so many divorces?"
"Oh, it's the same old tale."

A coed with brains goes to the head of the professor's class, but the coed with class goes to the head of the professor.

BCNU guys and gals
